## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-9, 14, 15, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Giersdorf et al. (5,114,446).

In figures 1-5, Giersdorf et al. teach a deoiler 16 capable of communicating with a source of air contaminated with oil, comprising: at least one separator 20,22 for separating the oil from the air; and a source of suction (impeller shown in figure 2) for reducing pressure at the source of the contaminated air.

Claims 1-7, 14-16, and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Thebert (4,683,714).

In figures 1-2c, Thebert teaches a deoiler capable of communicating with a source of air contaminated with oil, comprising: at least one separator 118 for separating the oil from the air; and a source of suction 102 for reducing pressure at the source of the contaminated air.

***Allowable Subject Matter***

Claims 10-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 17 is allowed.

***Prior Art***

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of two patents.

Avondoglio (4,877,431) is cited to show a deoiler having a separator, but fails to teach a source of suction.

Soddy (2,774,444) is cited to show a deoiler having a separator, but fails to teach a source of suction.
